Aesthetic benefits

The imate helps you feel better about your working environment, by:

- > Giving you a view of your surroundings
- > Overcoming that isolated, 'stuck in a corner' feeling
- > Making it easier to communicate with colleagues

Ergonomic benefits

Many computer users suffer (sometimes unknowingly) from Computer Vision Syndrome (eye strain).

The imate helps you avoid CSV by:

- > Encouraging you to look up from the screen
- > Tempting you to blink
- > Allowing you to re-focus your eyes

Safety benefits

Many people work with their backs to the rest of the office.

This can make you feel vulnerable and at times uneasy.

In some situations it can even be dangerous.

The imate gives you peace of mind by:

- > Allowing you to see who is behind you
- > Alerting you to potential danger
- > Giving you time to hide confidential information on your screen

Feng Shui and design benefits

Feng Shui is the ancient oriental art of placement and design.

It is used to balance and enhance the flow of energy in living environments.

Feng Shui creates harmony and helps to improve productivity. Whether you follow the mystical ways of Feng Shui or not, good design makes good sense.

The imate helps by:

- > Giving you more opportunities for desk placement
- > Opening up formerly closed environments
- > Removing the need to redesign workspaces for visual reasons
- > Allowing users to see the door behind them
(important for Feng Shui exponents)
